How do I automaically open a form at login in client server version.

-

- To open a form on login to the client:
- This option is available per machine
- Right click on the Priority shortcut on your desktop and select properties
- In the "target" field you can add a command after the ones already in there saying:
- -F FORMNAME
- Replace FORMNAME with the name of the form that you would like to open upon login. Make sure to write the formname in capital letters.
- Example target: C:\priority-emerge\bin.95\WINMENU.exe -F ORDERS
- This opens the "Sales Orders" form upon login.
- Click OK and then close and re-open Priority
